| 17 | <i>Hamamelis x intermedia</i> 'Sunburst' | 2000-130*A |

Morris Arboretum
& Gardens

UNIVERSITY of PENNSYLVANIA

‘Witchhazel’ is your favorite?

Witchhazel (family Hamamelidaceae) flowers are yellow, orange or red and appear during the gray days of fall and winter. Each fragrant flower has slender petals. Can you count them? The witchhazels you see today won’t have any leaves. Witchhazels are deciduous and lose their leaves in

Fun Facts

- Witchhazels are often called snapping hazels because the fruit capsules explode to release black seeds when ripe.
- The bark and leaves of witchhazels are used in herbal medicines as an astringent, a chemical that dries, tightens, and hardens body tissue. Witchhazel oil is used in after-shave lotion and lotions to treat bruises, sunburn, and insect bites.

Record the sights and smells of your favorite witchhazels in the Garden
